Working Rx Claims Dismissed!

Las Vegas (February 7, 2006) - In an expected and sweeping victory for carriers, employers and pharmacy benefit managers, Working Rx's claims against ScripNet were dismissed by a Federal District Court on Monday, February 6.

Working Rx, a collections company specializing in pharmacy receivables filed suit against ScripNet on October 12, 2005. In the complaint, Working Rx claimed that it was underpaid for pharmaceuticals dispensed by pharmacies that had assigned payment rights to Working Rx. Ruling from the bench, Federal District Court Judge Clive Jones granted ScripNet's motion to dismiss Working Rx's causes of action.

Notably, during the hearing, Judge Jones reminded Working Rx's counsel, and Working Rx's counsel seemingly agreed that as a pharmacy assignee, Working Rx had no greater rights to compensation from ScripNet than the contracted pharmacy would have.

Judge Jones did grant Working Rx the opportunity to amend its pleadings to state a valid claim, but only if it does so within three weeks. ScripNet continues to seek declaratory relief against Working Rx in Travis County, Texas.

ScripNet is a national Pharmacy Benefit Manager that contracts with workers' compensation insurance carriers and pharmacies to ease the availability of prescription medications to injured workers. Working Rx is a billing and collections company that purchases workers' compensation drug claims from pharmacies at a discount.

"This is a great victory for ScripNet and its clients nationwide" said ScripNet CEO, Dennis M. Sponer.

ScripNet, a three time winner of Inc. Magazine's annual listing of the 500 fastest growing privately held companies in the nation holds proprietary software that allows pharmacies to bill insurance carriers. Insurance carriers, large self-insured companies, and municipalities nationwide enlist ScripNet to process prescription drug claims for workers' compensation. ScripNet can be found on the web at www.scripnet.com.
